IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

First Named Inventor :	Yannick Delibie	Confirmation No: 5153
Appln. No.:	10/577,298	Group Art Unit: 2617
Filed :	December 27, 2006	
For :	Method and Device for Accessing a Mobile Server Terminal of a First Communication Network by Means of a Client Terminal of Another Communication Network	Examiner: Munsoon Choo
Docket No.:	W51.12-0026	

REPLY TO INTERVIEW SUMMARY

ELECTRONICALLY FILED MARCH 31, 2010

Sir:

Applicant would like to thank the Examiners for the courtesies extended during a telephone interview held on March 8, 2010 with the undersigned attorney and Examiners Choo and Corsaro.

During the interview, the undersigned attorney discussed the various steps described in the specification with respect to figures 2 and 3, which lead to a direct communication tunnel between the mobile server terminal and client terminal, as shown at the bottom of figure 3 and in figure 4. Applicant's attorney explained that at least two elements in claim 1 are new:

1.   The direct communication tunnel between the mobile server terminal and the client terminal; and

2.   Initiation of the communication session by an SMS or email message.

Applicant's attorney then described that the LIU reference discloses only discrete tunnels between certain components, not from the mobile terminal to the client node. The LIU reference also does not disclose setting up a direct communication tunnel with an SMS message or an

email message. While the Examiners agreed that the present amendments to claim 1 appear to overcome the rejections based on LIU, further searching may be needed.

The Director is authorized to charge any fee deficiency required by this paper or credit any overpayment to Deposit Account No. 23-1123.

Respectfully submitted,

WESTMAN, CHAMPLIN & KELLY, P.A.
